Mosaic celebrating 10 years @MosaicatOrient

Restaurant Mosaic have always been passionate about romance and celebrating excellence in food and wine, embracing all things beautiful while being dedicated to achieving perfection. In celebration of their ten year anniversary, they have remodeled the restaurant interiors, adding additional historical Art Nouveau detail and a fresh new approach to the existing décor and design.

Retief van Wyk, an internationally known glass and ceramic master and currently the subject leader for Glass Design and Technology at the Tshwane University of Technology is not only the creator and artist behind Chantel's glass tableware, but he also specially crafted the unique Art Nouveau tiles for the newly re-designed dining areas.

The talented David Muirhead, one of South Africa's most prolific interior design experts, with a long list of both local and international experience, is so well respected internationally that he features in The Andrew Martin Interior Design Review – The Oscars of Interiors. With a skillful touch, he perfectly captured Mosaic's vision for romance and elegance in his re-design of their Champagne Bar.
